

# ELBOWS

BAR TEXT

TITLE TEXT

461

THIS FILE IS USED FOR QUICKLY MOCKING UP LCARS INTERFACES. WHEN DIRECTLY USED WITH THE LCARS SDK POSITION VALUES, WIDTHS, HEIGHTS AND OTHER ELEMENT DATA CAN BE DIRECTLY TRASFERED INTO A CSS SETTING.

THIS TEMPLATE IS BASED OFF THE MATH PROVIDED BY ELEANOR OF THE LCARS47 GROUP, WHICH IS ALL BASED ON THE ORIGINAL WORK OF MR. M OKUDA.

THE SDK DOES NOT UTILIZE A FORMULA BUT INSTEAD A SIZING PATTERN WHICH REPRESENTS THE END RESULT OF THE MATH.

60 PX HIEGHT AND 150 PX WIDTH ARE THE DEFAULT FOR THE LCARS SDK.

EVEN WITH DIFFERENT SIZING PATTERNS THE ELBOW ARCS, BOTH INNER AND OUTER, SHOULD STAY THE SAME. ONLY THE WIDTH/HEIGHT CHANGES. THE 'BASE' ELBOW IS MEANT FOR CUSTOM OUTER AND INNER ARCS.
